

**[DRAFT] Data Sheet E – Results of Internal Review Committee**

Date of Review/Recommendation: October 26, 2010

Water Body Under Evaluation:

Water Body ID #: 0029  
Name: Sandy Creek (Class C)  
Length of Segment: 13.8 miles  
County (ies): Lincoln

Use Attainability Analysis (UAA) Study:

UAA ID #: 1334  
Submitter: SES. Inc.  
Date(s) Conducted: October 13, 2008  
Date Received: November 4, 2008  
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.  
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.  
☐ 3-Non-Remedial, Human Caused Condition.  
☐ 4-Hydrologic Modifications.  
☐ 5-Natural Physical Features.  
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in October 2008 and no evidence of WBCR was observed. There were multiple observations of ATV tracks and footprints along the stream segment. A tree stand was also observed. One interview was conducted, but no existing uses were noted.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 6 of 8 sites and the median depth criterion at 2 of 8 sites. Because the depth criteria were met, the committee recommends that the WBCR use designation be retained. Due to evidence of secondary contact recreation (SCR), the committee recommends that the SCR use be assigned.

**Committee Recommendation:** ☐ Add Use ☒ Retain Use ☐ Remove Use  
☐ Modify Use ☐ Inconclusive
